

Quality and Environmental Management Policy

GS E&C considers Quality and Safety as its top core values and will implement the quality and environmental policies to establish the best quality and eco-friendly workplace through proactive management as follows;

- Top Management express and will implement their commitment to quality and environmental management.
- We systematically establish and implement the company's quality and environmental strategies, and regularly inspect and improve the suitability and effectiveness of the quality and environmental management system.
- Comply with quality and environmental laws and standards.
- We strive to improve quality and environment through activities that will prevent quality nonconformities and environmental accidents.
- All executives and employees understand and comply with quality and environmental policies and goals.
- We provide quality and environmental awareness training to all executives and employees.

This policy is implemented under the responsibility of GS E&C management, and all executives and employees are responsible for quality and environment.

Recognizing the importance of quality innovation and establishing an eco-friendly workplace.
